No. Of participants: 20

Description of events :

Halloween was right around the corner and we, the dance club wanted to bring the spirit of the spooky season to Yenepoya in the form of dance. As everyone showed utmost enthusiasm for the event, we discussed about the songs we could use for the workshop. Over the course of active discussion, the majority voted for the cult classic, Everybody by the

Backstreet Boys. The choreography lasted a minute with the steps being of moderate skill difficulty so as to allow for visible progress. Prior to the session, we had a fun little game of musical statues or as we call it zombie freeze. The choreography was well appreciated by those who were proficient in dancing as well as those who are coming out of their shell. We introduced the concept of tutting, which was relatively new for everyone involved. It was a successful event as everyone had a fun time and picked up the choreography. Refreshments were given shortly after. A special shoutout to the art club for taking the effort and time to decorate the indoor auditorium to liven up the feeling of halloween.

Feedback :

1. The event was a huge blast for me. Everyone who came picked up the choreography even though the steps were moderately tough. It gave me a sense of fulfillment. It helped me realise how much I enjoy teaching others. I am excited for the future events.

- Anushka Raut Desai, 19M027

2. What a power packed workshop! It had the best teachers who took time to make sure everyone was on track and no one was left behind. The Halloween theme was brought out perfectly with the decor and the music and by the end of it, I was convinced to never miss one of these. -Prajna Jangam
