**PRINCIPAL / DEAN
YENEPOYA MEDICAL COLLEGE
MANGALORE-575018**

**Professor & Head
Department of Pathology
Yenepoya Medical College
Mangaluru-575018**

Number of Lectures taken / year : 30
Topic covered

1. Classification of Renal Tumors and RCC. Cytogenetics and genetics, Morphology, and Clinical features of RCC.
2. Diseases of uterus
3. Parathyroid, Pituitary, MEN
4. Pathogenesis, Premalignant lesions, morphology, prognostic factors and clinical course of SCC, BCC and Malignant Melanoma
5. Soft Tissue Tumors- Benign and malignant lesions – Neurofibroma, Schwannoma, Lipoma, Liposarcoma, Leiomyoma, Leiomyosarcoma, Synovial sarcoma, Rhabdomyosarcoma
6. Introduction to Pathology
7. Healing and repair - Define and describe the process of repair and regeneration including wound healing and its types
8. Amyloidosis - Describe the pathogenesis and pathology of amyloidosis
9. Leukocyte disorders- Describe the etiology, genetics, pathogenesis classification, features, hematologic features of acute leukemia
10. Leukocyte disorders - Describe the etiology, genetics, pathogenesis classification, features, hematologic features of chronic leukemia.
11. Gastrointestinal tract -Introduction – briefly about polyps of the GIT. Describe the etiology, pathogenesis, pathology and distinguishing features of carcinoma of the colon
12. Cardiovascular system- Describe the etiology, pathophysiology, pathology, gross and microscopic features, criteria and complications of rheumatic fever. Describe the etiology, pathophysiology, pathology features and complications of syphilis on the cardiovascular system, CVS syphilis. List the Congenital Heart Diseases.
13. Define classify and describe the genetics, inheritance, etiology, pathogenesis, pathology, laboratory, urinary findings, distinguishing features, progression and complications of cystic disease of the kidney
14. Female Genital Tract-Describe the pathogenesis, etiology, pathology, diagnosis and progression of leiomyomas and leiomyosarcomas of uterus & extrauterine sites. Describe the etiology, hormonal dependence, features and morphology of endometriosis. Describe the etiology and morphologic features of adenomyosis
15. Immunohistochemical staining in GATA3 in urothelial ca and normal tissues
16. Barretts oesophagus
17. Important lesions in Bone, Soft tissue, skin
18. Types of casts & their significance
19. PNH and Recent advances in diagnosis
20. Significance of tear drop cells in a peripheral blood smear
21. Graft Versus Host disease
22. Role of pathologist in Assessing response to treatment of ovarian and endometrial cancers
23. Application of CK19 and CD56 IHC markers in the diagnosis of thyroid tumours
24. Prognostic significance of p16 Immunohistochemistry expression in Urothelial carcinoma
25. Recent advances in endometrial carcinoma
26. Ancillary Techniques in cytology
27. A study of CD 10 possibility of stromal cells in core needle biopsy specimen of breast cancer patient and its relation with histological grade & LVI.
28. Genetic instability
29. Electron microscopy
30. Gene editing

Department of Pathology
Yenepoya Medical College
Mangaluru-575018

PRINCIPAL / DEAN
YENEPOYA MEDICAL COLLEGE
MANGALORE-575018

Number of Lectures taken /year : 25

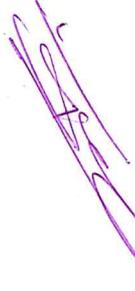

Topic covered

1. Diabetes mellitus
2. Renal malformation, polycystic kidneys , types and clinical features
3. Carcinoma Cervix Epidemiology, Etiopathogenesis, Classification, Morphology, Staging, Clinical features
4. Thyroid Gland- Multinodular goiter- Etiopathogenesis, Morphology and Clinical course, myxedema
5. Metabolic diseases: Rickets/ Osteomalacia, osteoporosis, hyperparathyroidism, Paget's disease
6. Alzheimer's disease and Parkinsonism
7. Cell Injury and Adaptation- Intracellular accumulation of fats, proteins, carbohydrates, pigments. Describe and discuss pathologic calcifications.
8. Neoplastic disorders- Describe the molecular basis of cancer.
9. Immunopathology. Define autoimmunity. Enumerate autoimmune disorders, Define and describe the pathogenesis of systemic Lupus Erythematosus.
10. Lymph node and spleen-Describe and discuss the pathogenesis, pathology of HD and the differentiating features of Hodgkin's and non-Hodgkin's lymphoma.
11. Urinary Tract- Define and classify glomerular diseases. Enumerate and describe the etiology, pathogenesis, mechanisms of glomerular injury, pathology, distinguishing features and clinical manifestations of glomerulonephritis (nephritic)
12. Bone and soft tissue-Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of soft tissue tumors (Adipose, fibrous, neural, striated muscle, synovial sarcoma)
13. Male Genital Tract- Describe the pathogenesis, pathology, presenting and distinguishing features, diagnostic tests, progression and spread of carcinoma of the penis
14. Endocrine system – Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications and metastases of pancreatic cancer.
15. Evolving concepts in celiac disease
16. Approach to polycythemia
17. Pathology of Primary splenic B-cell lymphomas : A review
18. Practical guide to training and validation for primary diagnosis with digital pathology
19. Cell cycle regulations in health and disease
20. Prognostic impact of Her2/neu expression on squamous head and neck carcinoma
21. Discrepancies in blood grouping
22. Angiogenesis in Renal cell carcinoma: Correlation of microvessel area with other prognostic factors
23. Molecular genetics of lung tumours
24. Viral oncogenesis
25. Grossing and reporting of colorectal cancer resection specimens: An evidence – based approach

					22 Yrs. 9 months				

PRINCIPAL / DEAN
YENEPOYA MEDICAL COLLEGE
MANGALORE-575018

Professor & Head
Department of Pathology
Yenepoya Medical College
Mangaluru-575018

Number of Lectures taken / year : 28

Topic covered

1. Diabetes mellitus –Definition, classification and diagnosis, pathogenesis of DM
2. Renal stones - Types, Cause and Pathogenesis, Morphology and Clinical features Hydronephrosis - Obstructive lesions of the urinary tract , Definition, Morphology and Clinical features
3. Endometrial Carcinoma-Clinical presentation, Classification, Morphology and Grading, Factors influencing outcome.
4. Hashimoto thyroiditis, autoimmune and Graves disease- Pathogenesis, Morphology and clinical course.
5. Thyroid tumors- Classification, Carcinomas- Papillary, follicular – Pathogenesis, Morphology and Clinical Course.
6. Brain Abscess, Tuberculosis, Cysticercosis
7. Cell Injury and Adaptation -Demonstrate knowledge of the causes, mechanisms, types and effects of cell injury and their clinical significance. Describe the etiology of cell injury.
8. Distinguish between reversible-irreversible injury: mechanisms; Morphology of reversible cell injury
9. Hemodynamic disorders - Define and describe shock, its pathogenesis and its stages. Define and describe the etiology, pathogenesis, pathology, laboratory, urinary findings, progression and complications of acute tubular necrosis (brief)
10. Introduction to haematology - Describe hematopoiesis and extramedullary hematopoiesis
11. Gastrointestinal tract- Describe the etiology, pathogenesis, pathology, microbiology, clinical and microscopic features of peptic ulcer disease & gastritis
12. Respiratory system -Define and describe the etiology, types, pathogenesis, stages, morphology and complications of pneumonia. Describe the etiology, gross and microscopic appearance and complications of lung abscess.
13. Cardiovascular system- Describe the etiology, pathophysiology, pathology, gross and microscopic features, diagnosis and complications of infective endocarditis. Classify and describe the etiology, types, pathophysiology, pathology, gross and microscopic features, diagnosis and complications of cardiomyopathies
14. Bone and soft tissue- Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of bone tumours
15. Female Genital Tract- Classify and describe the etiology, pathogenesis, pathology, morphology, clinical course, spread and complications of ovarian tumors – germ cell, Sex-cord stromal
16. Breast - Classify and describe the epidemiology, pathogenesis, classification, morphology, prognostic factors, hormonal dependency, staging and spread of carcinoma of the breast
17. Eye - Describe the etiology, genetics, pathogenesis, pathology, presentation, sequelae and complications of retinoblastoma
18. Hematogens
19. Preoperative endoscopic tattooing technique improved lymph node retrieval in rectal cancer patients receiving neoadjuvant CCRT
20. Immunopathology of Leprosy
21. Morphological and immunophenotypic clear to the WHO categories of AML
22. Placental pathology in COVID -19
23. Liquid biopsy in tumour diagnosis
24. CD30+Lymphoproliferative disorders.
25. Bcl2 and p53 protein expression, apoptosis and p53 mutation in human epithelial ovarian cancer
26. Automation in cytopathology
27. Liquid biopsy
28. KI 67 expression in prolactin secretion pituitary adenomas

 PRINCIPAL / DEAN
 YENEPOYA MEDICAL COLLEGE
 MANGALORE-575018

Professor & Head
 Department of Pathology
 Yenepoya Medical College
 Mangaluru-575018

Number of Lectures taken /year : 35

Topic covered

1. Pancreatic carcinoma
2. Pathogenesis of glomerular injury. Classification of glomerular diseases. Histologic alterations in glomerulonephritis
3. Wilms Tumor
4. Ovarian tumors-Classification and histogenesis. Morphology and clinical features of Serous and mucinous tumors. Brief mention of other surface epithelial tumors.
5. Pathology of Kidney & Urinary Tract-Introduction-The normal structure and function of kidney, Clinical manifestation of renal diseases, Laboratory tests to detect renal disease
6. Anaplastic, and Medullary carcinoma
7. Neuropathology - Non neoplastic lesions, Inflammations and infections:
8. Cell Injury and Adaptation- Describe and discuss cellular adaptations
9. Hemodynamic disorders - Define and describe the etiopathogenesis and consequences of thrombosis, Macrocytic anemia
10. Hemorrhagic disorders -Haemophilia
11. Respiratory system - Define and describe the etiology, types, pathogenesis, stages, morphology and complications and evaluation of Obstructive airway disease (OAD) and bronchiectasis.
12. Urinary Tract - Define classify and describe the etiology, pathogenesis, pathology, laboratory, urinary findings, distinguishing features progression and complications of renal stone disease and obstructive uropathy
13. Bone and soft tissue - Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications of osteomyelitis
14. Female Genital Tract - Describe the etiology, pathogenesis, pathology, morphology, clinical course, spread and complications of gestational trophoblastic neoplasms
15. Basic diagnostic cytology - Describe the diagnostic role of cytology and its application in clinical care. -Describe the basis of exfoliative cytology including the technique & stains used
16. High WHO/ISUP Grade 2 unfavourable architecture, rather than typing of papillary renal cell carcinoma, May be area with worse prognosis
17. Evaluation of E-cadherin and vimentin expression as prognostic markers for EMT, Tumour aggressiveness in breast cancer – Sudan
18. Non-neoplastic lesions of the lymph node
19. Guidelines for competency based postgraduate training programme for MD in Pathology
20. An algorithmic immunohistochemical approach to define tumour type and assign site of origin
21. Indian academy of cytologists National guidelines for cytopathology laboratories for Handling suspected and positive COVID-19 patient samples.
22. Giant cells – Rich lesions of bone
23. Ovarian germ cell tumour classification views from the testis
24. Artificial intelligence in Pathology
25. Clinicopathological features and D/D of Chondrogenic tumour.
26. Role of Immunopathology in diagnosis of Kidney disease
27. Grossing issues in ovarian and fallopian tube pathology
28. Prognostic and clinicopathological value of GATA binding protein 3 in breast cancer – systemic review and meta-analysis
29. The silva pattern based classification for HPV associated invasive endocervical adenocarcinoma and the distinction between in situ and invasive adenocarcinoma: Relavent issues and recommendations for international society and Gynaecological pathologists
30. Expression of Cox-2 and Her-2 in colorectal cancer and their correlation.
31. Placental pathology findings during and after SARS Cov 2 infection: Features of Villitis and malperfusion
32. Utility of immunofluorescence in Dermatology
33. GATA3 as an adjunct prognostic factor in breast cancer patient with less aggressive disease – A study with a review of literature
34. EGFR analysis on scraping from cytology smears in lung carcinoma, an effective alternative to testing on trucut biopsies
35. Postmortem changes associated with SARS-Cov-2 systematic review and meta- analysis

Department of Pathology
Yenepoya Medical College
Mangaluru-575018

PRINCIPAL / DEAN
YENEPOYA MEDICAL COLLEGE
MANGALORE-575018

Number of Lectures taken / year : 26

Topic covered

1. Nephrotic syndrome – Definition, and Etiopathogenesis, Morphology, Clinical features, Lab diagnosis and Clinical course , diseases causing nephritic syndrome. Minimal change disease and FSGS
2. Granular contracted Kidney- Causes, Gross and Microscopy, and chronic renal failure. Tubule interstitial disease : acute tubular necrosis
3. Transitional Cell Carcinoma – Etiopathogenesis, Classification, Sites, Morphology and Clinical course
4. Germ Cell tumors - Morphology and clinical features of teratoma and Dysgerminoma.
5. Adrenal Gland-Pheochromocytoma- Rule of 10s, Genetic basis, Morphology and Clinical Course, and Neuroblastoma- Sites, Age group, morphology, clinical course and prognostic features.
6. Brain tumors- Classification based on cell of origin, Location of different classes of brain tumours and clinical features in general Classification of Gliomas and grading of tumors.
7. Cell Injury and Adaptation- Describe and discuss Cell death- types, mechanisms, necrosis (apoptosis as contrasted with necrosis), autolysis. Describe and discuss gangrene
8. Hemodynamic disorders - Define and describe embolism and its causes and common types. Define and describe Ischaemia/infarction its types, etiology, morphologic changes and clinical effects.
9. Microcytic anemia -Describe the etiology, investigations and differential diagnosis of microcytic hypochromic anemia. Describe iron metabolism
10. Blood banking and transfusion- Enumerate blood components and describe their clinical uses, Enumerate the indications and describe the principles and procedure of autologous transfusion
11. Enumerate and describe infections transmitted by blood transfusion. Describe transfusion reactions and enumerate the steps in the investigation of a transfusion reaction
12. Central Nervous System - Describe the etiology, types and pathogenesis, differentiating factors, CSF findings in meningitis
13. Skin & Oral SCC- Describe the etiology, pathogenesis, pathology and clinical features of oral cancers. Describe the risk factors pathogenesis, pathology and natural history of squamous cell carcinoma of the skin. Describe the risk factors pathogenesis, pathology and natural history of basal cell carcinoma of the skin
14. Endocrine system - Classify and describe the epidemiology, etiology, pathogenesis, pathology, clinical laboratory features, complications and progression of diabetes mellitus
15. Endocrine system - Classify and describe the epidemiology, etiology, pathogenesis, pathology, clinical laboratory features, complications and progression of diabetes mellitus
16. The burden of placental histopathology in still births associated with maternal obesity
17. Angiogenesis in health and disease
18. Elevated APTT levels, Differential diagnosis and approach
19. Peripheral smear finding its COVID 19 cases
20. Recent advances in testicular germ cell tumours.
21. The Milan system reporting salivary gland
22. Diagnostic utility of calretinin in deep fibromatosis when dilemma of spindle cell Mimic lesions are considered: An Immunohistochemical study
23. Aplastic Anemia
24. Endocervical adenocarcinoma, gross examination and processing – Including Intra-operative evaluation – Recommendation from international society of Gynaecological pathologists
25. Variation of hematological and biochemical indices in various types of malaria
26. Polyposis syndromes of GIT

					Fellowship Trainee	Smt. Kashibai Navale Medical College, Pune	01.09.2014	02.06.2017	2 Yrs, 9 months
						Amrita Institute of Medical Sciences, Cochin	05.06.2017	10.01.2018	2 Yrs, 1 month
					Associate Professor (Pathology)	Yenepoya Medical College, Mangalore	01.01.2021	Till date	1 Yr
					Total Experience after PG				5 Yrs, 9 months

Number of Lectures taken /year : 16

Topic covered

1. Cell Injury and Adaptation - Describe and discuss the mechanisms of cellular aging and APOPTOSIS.
2. Neoplastic disorders - Define and classify neoplasia. Describe the characteristics of neoplasia including gross, microscopy, biologic, behaviour and spread. Differentiate between benign from malignant neoplasm
3. Hemolytic anemia
4. Gastrointestinal tract - Describe etiology and pathogenesis and pathologic and distinguishing features of Inflammatory bowel disease.
5. Hepatobiliary system - Classification of cirrhosis. Describe the pathophysiology, pathology and progression of alcoholic liver disease including cirrhosis Describe the etiology, pathogenesis and complications of portal hypertension. Describe the pathophysiology and pathologic changes seen in hepatic failure and their clinical manifestations, complications and consequences
6. Hepatobiliary system - Describe the etiology and pathogenesis of viral and toxic hepatitis: distinguish the causes of hepatitis based on the clinical and laboratory features. Describe the pathology, complications and consequences of hepatitis
7. Respiratory system - Define and describe the etiology, types, exposure, genetics, environmental influence, pathogenesis, stages, morphology, microscopic appearance, metastases and complications of tumors of the lung and pleura (mesothelioma)
8. Female Genital Tract - Describe the pathogenesis, etiology, pathology, diagnosis and progression and spread of carcinoma of the endometrium. Describe the etiology, hormonal dependence and morphology of endometrial hyperplasia (noncore)
9. Male Genital Tract - Describe the pathogenesis, pathology, hormonal dependency presenting and distinguishing features, urologic findings & diagnostic tests of benign prostatic hyperplasia. Describe the etiology, pathogenesis, pathology and progression of prostatitis (noncore)
10. Genetic and paediatric diseases (non core). Describe the pathogenesis and features of common cytogenetic abnormalities and mutations in childhood
11. Genetic and paediatric diseases (non core) - contd. Describe the pathogenesis and features of common cytogenetic abnormalities and mutations in childhood.
12. Molecular classification of GIST
13. Cytological assessment of cystic/introducal lesion of the pancreaticobiliary tract
14. SARS Cov2 and placenta : new insights & Perspectives
15. Autoimmune hepatitis
16. Neuroblastic tumours of adrenal gland

Professor & Head
 Department of Pathology
 Yenepoya Medical College
 Mangaluru - 575 018

 PRINCIPAL
 YENEPLOYA MEDICAL COLLEGE

Sl. No	Department	Name of the Faculty/Qualification	Current Designation & Date of Promotion	Nature of Employment Regular/	Details of Service in the Last 5 years				
					Designation	Institution	From	To	Total
7	Pathology	Dr. Supriya P. MBBS/MD Medical Reg. No. 91382	Assistant Professor 25.01.2017	Regular /Permanent	Tutor (Pathology)	Shri Dharmasthala Manjunatheshwara College of Medical Sciences & Hospital, Dharwad	05.06.2013	15.07.2016	3 Yrs, 1 month
					Assistant Professor (Pathology)	AI Azhar Medical College, Thodupuza	03.09.2016	21.12.2016	3 months
					Assistant Professor (Pathology)	Yenepoya Medical College, Mangalore	25.01.2017	Till date	4 Yrs, 11 months
					Total Experience after PG				

Number of Lectures taken / year : 26
Topic covered

- GALL BLADDER -Cholelithiasis
- Etiopathogenesis, Morphology, Clinical features, Lab diagnosis and Clinical course of Membranoproliferative glomerulonephritis, and Membranous Nephropathy
- Adenocarcinoma prostate
- Gestational trophoblastic disease
- Arthritis
- Inflammation - Define and describe the general features of acute and chronic inflammation including stimuli - vascular events
- Hemodynamic disorders - Define and describe Oedema, its types, pathogenesis and clinical correlations. Define and describe hyperemia, congestion, hemorrhage
- Hemolytic anemia-Describe the pathogenesis, features, hematologic indices and peripheral blood picture of sickle cell anemia.
- Lymph node and spleen - Describe and discuss the pathogenesis, pathology of non-Hodgkin's lymphoma.
- Urinary Tract - Define, classify and distinguish the clinical syndromes. Define and describe the etiology, precipitating factors, pathogenesis, pathology, laboratory urinary findings, progression and complications of acute renal failure and chronic renal failure. Describe the normal histology of the kidney.
- Respiratory system - Tuberculosis
- Urinary Tract -Define and describe the etiology, pathogenesis, pathology, laboratory, urinary findings, progression and complications of IgA nephropathy. Enumerate and describe the findings in glomerular manifestations of systemic disease (DM, HT, SLE)
- Define classify and describe the etiology, pathogenesis pathology, laboratory, urinary findings, distinguishing features progression and complications of vascular disease of the kidney.
- Describe the etiology, genetics, pathogenesis, pathology, presenting features and progression of thrombotic angiopathies (Noncore)
- Female Genital Tract - Classify and describe the etiology, pathogenesis, pathology, morphology, clinical course, spread and complications of ovarian tumors – Epithelial, Metastatic
- Male Genital Tract -Describe the pathogenesis, pathology, hormonal dependencypresenting and distinguishing features, diagnostic tests,progression and spread of carcinoma of the prostate.
- Surface Ki67 expression improvesreproducibility of dysplasia diagnosis in Barrett esophagus
- Pulmonary pseudoneoplasms
- Pattern Recognition receptor for microbes
- Uncommon cervical lesions – A review and discussion of the differential diagnosis
- Announcement : International system for reporting lymph node cytopathology
- Hurtle cell neoplasms of the thyroid : An algorithmic approach to pathologic diagnosis in light of molecular advances
- How I investigate difficult cells at optical microscope
- IgG4-RD
- Autophagy
- Urine Analysis – Part 1
- Predictors of pathological complete response to neoadjuvant treatment and changes to post-neoadjuvant HER2 status in HER2-positive invasive breast Cancer.

Professor & Head

8	Pathology	Dr. Renuka Patil MBBS/MD Medical Reg. No.74379	Assistant Professor 01.02.2019	Regular /Permanent	Tutor (Pathology)	Yenepoya Medical College, Mangalore	10.07.2014	10.07.2017	3 Yrs
					Assistant Professor (Pathology)	Yenepoya Medical College, Mangalore	01.08.2017	31.01.2019	1 Yr, 6 months
						Yenepoya Medical College, Mangalore	01.02.2019	Till date	2 Yrs, 11 months
						Total Experience after PG			4 Yrs, 5 months

Number of Lectures taken /year : 23

Topic covered

- Hypertension – pathogenetic mechanism and morphology of kidney
- Brief mention of other testicular tumors, Tumor markers, Carcinoma penis
- Carcinoma Breast – Classification, Incidence, Epidemiology, Morphology, Prognostic and Predictive factors, Morphology and clinical course of Medullary carcinoma, Pagets disease
- Bone tumors-Introduction, Classification, Clinical features and Morphology of Osteochondroma, Giant cell tumor and Ewing sarcoma
- Inflammation - Define and describe the general features of acute and chronic inflammation including stimuli - Cellular events.
- Neoplastic disorders - Enumerate carcinogens and describe the process of carcinogenesis (chemical)
- Hemolytic anemia- Describe the pathogenesis, features, hematologic indices and peripheral blood picture of Hereditary Spherocytosis and peripheral blood picture of Acquired haemolytic anemia
- Hemorrhagic disorders -Classify and describe the etiology, pathogenesis and pathology of vascular and platelet disorders including ITP and von willebrands
- Cardiovascular system - Distinguish arteriosclerosis from atherosclerosis. Describe the pathogenesis and pathology of various causes and types of arteriosclerosis. Describe the etiology, dynamics, pathology types and complications of aneurysms including aortic aneurysms (brief)
- Urinary Tract-Define and classify glomerular diseases. Enumerate and describe the etiology, pathogenesis, mechanisms of glomerular injury, pathology, distinguishing features and clinical manifestations of glomerulonephritis (nephrotic)
- Skin- Describe the distinguishing features between a nevus and melanoma. Describe the etiology, pathogenesis, risk factors morphology clinical features and metastases of melanoma.
- Male Genital Tract-Classify testicular tumors and describe the pathogenesis, pathology, presenting and distinguishing features, diagnostic tests, progression and spread of testicular tumors
- Presentation by students & Discussion- LFT, CSF Charts
- Diagnosis of mesothelial lesions and their pitfalls
- Malaria pathogenesis, pathology and lab diagnosis
- The difference of clinicopathologic characteristic among subgroups of classified HER FISH all to ASIO/ CAP 2018 Breast cancer Her2 testing guidelines
- Leucoreduction methods
- Classifying DLBCL according cell of origin using Hansalgorith and its association with clinicopathological parameters: A single centre experience
- Postmortem computed Tomography and its applications
- Types and application of PCR.
- Role of special stains in histopathology (Part – 2)
- The papanicolous system of cytopathology system for reporting pancreaticobiliary cytology : A retrospective study
- Her-2 & Cox-2 expression in colorectal cancer and their distribution in different categories based on tumour border configuration

9	Pathology	Dr. Shubha Sudhakar	MBBS/MD Medical Reg. No.100065	Assistant Professor 01.02.2019	Regular /Permanent	Tutor (Pathology)	A. J. Institute of Medical Sciences, Mangalore Yenepoya Medical College, Mangalore	29.04.2014 15.12.2017	29.06.2017 31.01.2019	3 Yrs, 2 months 1 Yr, 1 month	
							Assistant Professor	Yenepoya Medical College, Mangalore	01.02.2019	Till date	2 Yrs, 11 months
							Total Experience after PG				4 Yrs

**Number of Lectures taken /year : 24
Topic covered**

- PANCREAS Acute and chronic pancreatitis- Etiology, Pathogenesis, Morphology, Clinical features, Long term. Outcome
- Acute & Chronic pyelonephritis- Causes, Clinical features, Morphology & Complications
- Diseases of cervix – cervicitis. Premalignant lesions of cervix – Classification, Risk factors, Pathogenesis and Morphology of Cervical Intraepithelial Neoplasia and role of Pap smear
- Fibroadenoma, Duct papilloma, Phylloides tumor, Gynaecomastia.
- Osteosarcoma, Chondrosarcoma- Pathogenesis, Morphology, Clinical features, Prognosis and metastatic
- Inflammation - Enumerate and describe the mediators of acute inflammation
- Neoplastic disorders- Enumerate carcinogens and describe the process of carcinogenesis (physical, viral)
- Hemolytic anemia - Describe the pathogenesis, features, hematologic indices and peripheral blood picture of thalassemia
- Plasma cell disorders
- Respiratory system-Define and describe the etiology, types, exposure, environmental influence, pathogenesis, stages, morphology, microscopic appearance and complications of Occupational lung disease.
- Urinary Tract -Classify and describe the etiology, genetics, pathogenesis, pathology, presenting features, progression and spread of renal tumours
- Describe the pathogenesis of common storage disorders in infancy and childhood. Tumour & Tumour-like lesions of childhood
- Endocrine system – non core - Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications of adrenal Insufficiency .Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications of Cushing's syndrome. Describe the etiology, pathogenesis, manifestations, laboratory and morphologic features of adrenal neoplasms.
- New and emerging renal tumour entities
- Hirschsprung Disease
- Clinicopathologic features of small renal masses associated with distant metastatic disease
- Embryonal CNS tumours in children
- Updates in staging and reporting of genitourinary malignancies..
- Grossing of breast cancer specimens: A comprehensive approach to hemolytic anaemia
- Clinical significance of the MELF pattern myometrial invasion in Low Grade endometrioid Type endometrial carcinoma.
- WHO classification of Brain Tumour : Preview of the upcoming 5th edition
- Cytogenetics
- Counting mitoses – SI Unit matters
- Urine examination

					Assistant Professor (Pathology)	Yenepoya Medical College, Mangalore	01.01.2021	Till date	1 Yr
					Total Experience after PG				

Number of Lectures taken / year : 16
Topic covered

1. Inflammation - Define & describe chronic inflammation including causes, types, non-specific & granulomatous; enumerate examples of each. Describe the pathogenesis and pathology of tuberculosis (Brief). Define & describe the pathogenesis & pathology of leprosy (Brief)
2. Neoplastic disorders - Describe the effects of tumor on the host including paraneoplastic syndromes. Describe immunology and the immune response to cancer.
3. Gastrointestinal tract - Describe and etiology and pathogenesis and pathologic features of carcinoma of the stomach
4. Cardiovascular system- Describe the epidemiology, risk factors, etiology, pathophysiology, pathology, presentations, gross and microscopic features, diagnostic tests and complications of ischemic heart disease. Describe the etiology, types, stages pathophysiology, pathology and complications of heart failure
5. Central Nervous System - Classify and describe the etiology, genetics, pathogenesis, pathology, presentation sequelae and complications of CNS tumours
6. Female Genital Tract-Describe the epidemiology, pathogenesis, etiology, pathology, screening, diagnosis and progression of carcinoma of the Cervix. Describe the etiology and morphologic features of cervicitis (noncore)
7. Endocrine system-Enumerate, classify and describe the etiology, pathogenesis, pathology and iodine dependency of thyroid swellings. Thyroid tumours. Describe the etiology, pathogenesis, manifestations, laboratory and imaging features and course of thyrotoxicosis/ hypothyroidism (brief)
8. Breast- Classify and describe the types, etiology, pathogenesis, pathology and hormonal dependency of benign breast disease including benign tumours. Enumerate and describe the etiology, hormonal dependency and pathogenesis of gynecomastia.
9. Polyps of the GIT
10. Prostate cancer growth patterns beyond the Gleason score: entering a new era of comprehensive tumour grading
11. CAR-T cells and updates
12. Metabolic disease of bone
13. Pathologic and molecular features of various subtypes of HCC : An update
14. The sentinel node invasion level (SNIL) as a prognostic parameter in melanoma
15. Tissue processing
16. Approach to thrombophilia.
